NHS Lothian

2025_01 (V1) NHS Lothian NMAHP – TRAK Introduction module (for read only access)

There has been a change to the training that students need to do to get **read only** access to Trak (no change to write access)

From 01.01.2025, all students who require **read only** access to TRAK must complete the **Lothian: Trak Introduction** module before they get issued their student account.   This module can be found on TURAS Learn and all users must have an account. This will bring students in line with staff who also need to complete training to get read only access to TRAK & give them an understanding of the basics and some familiarity with the TRAK screens, as well as information governance rules.

Request for read and write access remains the same as previously.

Users must be Signed In to their Turas account to have access: Trak Introduction | Turas | Learn

Lothian: TRAK Introduction module training content

Part 1: Information Governance
Part 2: Learning Content

MODULE 1 - Trak Introduction:
Logging On/Off
Finding a patient
Patient Enquiry screen
Update Demographics
View appointments
View Electronic Patient Record

MODULE 2 - Practice Session
